

DoseLogix Files Patent Infringement Lawsuit against UnoDose Manufacturer, Reflex Medical Corp.

Woodstock (Atlanta), GA, November 22, 2019 – DoseLogix, LLC, the creator of Topi-CLICK® and industry leader in the design and manufacture of topical metered-dosing applicators, announced that it has filed a lawsuit against Reflex Medical Corp. in the United States District Court for the District of Minnesota for infringement of DoseLogix’s U.S. Patent No. 10,435,226. The suit seeks to enjoin and recover damages for Reflex Medical Corp.’s misappropriation of DoseLogix’s patented technology through the sale of the Reflex UnoDose Metered-Dose Topical Applicator.

The original DoseLogix Topi-CLICK® was introduced in 2007, creating a brand loyalty among compounding pharmacists, physicians and patients with its innovative metered-dosing applicator. The Topi-CLICK® 35 dosing applicator established the bench mark for ease-of-use and accuracy and has been cited in the *International Journal of Pharmaceutical Compounding* peer reviewed “Topical Metered-dosing Dispenser Evaluation” and featured on nationally syndicated health and wellness television shows.

DoseLogix has invested years of research and development into patented technological advancements of its topical dosing applicators to serve patients in the human and veterinary markets. DoseLogix President & Founder Tim Phipps said, “As an innovator in the industry, we’ve obtained patents to protect our technology designed to provide the most accurate and easy-to-use dispensing methods. We will take the necessary actions to defend our intellectual property.”

As a pacesetter in the industry, DoseLogix continues to develop leading-edge advancements in dosing applicators. The Topi-CLICK Perl® Vaginal Dosing Method, set a new standard for feminine dosing and was featured in an accuracy study evaluation in the nationally acclaimed *American Journal of Internal Medicine*. The Topi-CLICK Micro® offers a revolutionary method for micro-dosing humans and pets and is being adopted at an even more rapid rate than Topi-CLICK® 35 and Topi-CLICK Perl®.

About DoseLogix
