

- ✓ Flexible Easy-press Buttons™ to eject full troches.
- ✓ Large label surface on cover.
- ✓ No need for extra sleeve covers.
- ✓ Dispense directly to patient with disposable mold design.
- ✓ Heat resistant tray means less warping when filling or removing excess base with heat gun.
- ✓ Packaging is certified to US16 CFR 1700.20 and ISO 8317 as child resistant.

Easy-Press
Button™

Vibrant orange Troche-CLICK™ tray is exclusive to our child resistant packaging.

Filling Instructions

STEP 1:
Squeeze side of box where it's marked push. Gently slide insert tray out.

STEP 2:
Place the Troche-CLICK™ tray on a clean, level surface. Fill the Troche-CLICK™ with mixture.
Filling techniques may include: pouring directly from a glassbeaker, transferring mixture using a syringe or transfer pipette.

STEP 3:
Remove excess troche material by scraping over the top of the troche lozenges with a clean spatula.
The PEG base shrinks during cooling. Add additional material to the individual cavities, if required.

STEP 4:
After the troche material has set, a heat gun can be used to remelt the top of the troche material to provide a polished appearance to the troches.

STEP 5:
Troche lozenges can be removed and then replaced to conduct quality checks.

STEP 6:
Place troche tray into insert tray. Fold flap to engage child resistant mechanism, then slide troche tray and insert tray into the box.

STEP 7:
Label can now be applied to the child resistant packaging.

TECHNICAL SPECIFICATIONS: Topi-CLICK® Troche-CLICK™

Topi-CLICK® Troche-CLICK™ Child Resistant Specifications

Topi-CLICK® Troche-CLICK™ : Each cavity calibrated to 1.0 gram with PEG 1450. Scored halves and quarters allow customizable dosing.

DESCRIPTION: Topi-CLICK® Troche-CLICK™ is an innovative way to provide an accurate dose to patients in a troche lozenge. The easy-to-fill Troche-CLICK™ increases pharmacy efficiency and improves the patient experience with medications dispensed directly from the disposable mold design. This design is child resistant.

Packaging is certified to US16 CFR 1700.20 and ISO 8317 as child resistant.

FEATURES:

- Each cavity will contain a 1.0g (PEG 1450) smooth troche lozenge designed for comfortable usage.
- Each cavity provides score lines for easy division of troches into halves or quarters for greater customizability of dosing.
- Each cavity has a textured, easy eject button for quick removal of troches from the tray.
- Large labeling surface on outer box.
- Secondary labeling surface on clam shell.
- Translucent tray allows for easy view of doses remaining.
- CLICK locking mechanism designed to be child resistant.
- Manufactured from heat resistant materials.
